

# ADDITIONAL FOIL/MYLAR HANGING TIPS READ BEFORE PROCEEDING

1

## INSTALLATION OF A LINER PAPER IS RECOMMENDED.

The reflective mylar surface will highlight any imperfections on the wall surface.  
Use of a liner helps to achieve a smooth finish.

2

## PASTE THE WALL - NOT THE WALLPAPER

For an easy installation, apply the wallpaper paste directly to the wall with a roller. Then install the dry, trimmed wallpaper one panel at a time per the Wallpaper Hanging Instructions.

3

## TRIM WITH CARE WHEN PAPER IS WET

Foil and Mylar become delicate when wet and may separate from paper backing. Be sure to use a new sharp blade and change it often during installation (at least every other panel).
